

TRIP B. - GEOLOGY AND OIL & GAS EXPLORATION IN WESTERN NEW YORK -
Bastedo and Van Tyne.

There is no road log available for this trip because at the time this guidebook was being compiled, we couldn't be sure of what operations it might be possible to visit. We will be visiting the Drake Well Museum at Titusville, Pennsylvania and hope to make two or three other stops along the way. These stops will depend upon what, if any, drilling activities are being conducted in the area on the day of the trip.
